Implementation of the REACH Regulation at alfi

The EU Regulation on Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) has taken effect on 1 June 2007.

The Regulation relates to substances as such and/or substances in preparations. Every substance that is put into circulation in a quantity exceeding one ton per year by a manufacturer or importer will be subject to REACH and the pertinent mandatory registration.

Manufacturers and importers must register substances.

Under the Regulation, alfi considers its function within the supply chain as that of a distributor and/or producer of a product in relation to alfi's customers and undertakes to comply with the resulting obligations in due time.

Manufacturers, suppliers and EU importers are advised even in the delivery instructions on the REACH compliance.

According to the present status, none of our products contains any substances in concentrations exceeding 0.1 percent weight/weight (w/w) meeting the criteria of Article 57 and identified in accordance with Article 59, Paragraph 1 of the REACH Regulation.

We currently understand that all substances concerning alfi will be registered by our manufacturers, suppliers and EU importers. This will ensure production and delivery beyond 1 December 2008.
